

Coconut water Qualities

Green Coco Europe brought coconut water to Europe. As an innovator and paved the way for the whole category. With more than 17 years of expertise and experience we offer our customers comprehensive coconut water know-how.

Following we show you the differences of the different coconut water qualities...

Young

Coconut juice
from young coconuts

Quality: Premium

High priced raw material. Due to the harvesting of the young nut, it has barely developed pulp (lower added value).

Taste profile: Genuine.

Brazilian/Asian, slightly coconut, sweetish (max 5.2 Brix refrac), full-bodied, more acid (PH 4.7 to 4.9).

Age of the nuts: 3 to 7 months

Use in Asia and South America traditionally for drinking and accompanying in medicine.

Filling

Germany, IFS Food 6 Higher Level.

Legal status

100% single strength juice (NFC);
Highest Level of the European Fruit Juice Regulation.

Product

Dr. Antonio Martins coco juice.

King

Coconut juice
from young king coconuts

Quality: High premium

High priced raw material. Only grows on Sri Lanka. Traditional coconut just for drinking. Does not develop pulp (lower added value).

Taste profile: Original.

Sri Lankan, very slight coconut, refreshing (max 5.2 Brix refrac), full-bodied, more acid (PH 4.7 to 4.9).

Age of the nuts: 3 to 7 months

Use in Sri Lanka traditionally for drinking and accompanying in medicine.

Filling

Germany, IFS Food 6 Higher Level.

Legal status

100% single strength juice (NFC);
Highest Level of the European Fruit Juice Regulation.

Product

Dr. Antonio Martins king coco juice.
